Mostafa Karam Saeed

Flutter Developer · Mobile & Dashboard Applications · Clean Architecture
Awsim, Giza, Egypt · +20 111 331 2766 · GitHub · LinkedIn · mostafakaram345678@gmail.com

SUMMARY

Flutter Developer with 2 years of professional experience at MDSoft, developing and maintaining production-ready mobile and dashboard applications. Experienced in building scalable Flutter applications using Dart, Clean Architecture, Bloc/Cubit, REST APIs, Firebase, and modern development practices. Contributed to 5 live production projects, including mobile applications published on Google Play and the Apple App Store, along with web-based dashboards. Also familiar with AI Automation and integrating automation concepts into modern software development workflows.

EXPERIENCE

Flutter Developer · MDSoft *2024 – Present*

- Developed and maintained multiple production-grade Flutter mobile applications published on Google Play and the Apple App Store.
- Built and deployed KORLEN, a full-featured e-commerce app, along with 2 white-label clones: HTG and Veron, sharing a common codebase with customised branding and configuration.
- Developed Tok Tok Taxi, a complete delivery and ride-hailing platform with live location tracking, an admin dashboard, and separate user, driver, and agent applications, including Bluetooth receipt printing and internal printing support.
- Developed Gb Ghadir, a full-featured e-commerce app integrated with WhatsApp chat and a custom WebSocket-based live chat for real-time technical support.
- Developed VA Note, a patient management and appointment scheduling app with Firebase Firestore, FCM reminders, and MVVM Clean Architecture.
- Developed Vitamin, a restaurant order management app with a customer ordering app and an admin dashboard for managing orders, categories, and sub-products, integrated with a third-party delivery service and the QCard payment gateway.
- Configured CI/CD pipelines using GitHub Actions for automated APK/AAB builds and deployments.

Flutter Intern · Orange Digital Center *2022 · 3 months*

- Completed intensive hands-on Flutter and Dart training covering widgets, navigation, and responsive UI design.
- Built mobile app screens with reusable widgets and clean, maintainable project structure.
- Consumed REST APIs and managed app state using Bloc/Cubit.
- Practised Git-based workflows and delivered a practical Flutter project at the end of the program.

Flutter Intern · Instant Software Solutions *2022 · 3 months*

- Developed Flutter application features and UI screens from design specifications.
- Integrated REST APIs and handled loading, error, and empty states across screens.
- Applied Bloc/Cubit state management and organised code with Clean Architecture principles.
- Worked with Firebase services and collaborated with the team using Git.
- Received a Certificate of Appreciation for completing the 3-month Flutter Developer training.

Training Courses · MASA for Training & Consulting *Jul – Sep 2022*

- **Flutter** — practical course, 16 Jul – 1 Sep 2022, 30 practical training hours (certificate of completion).
- **Advanced Flutter** — practical course, 21 Aug – 18 Sep 2022, 30 practical training hours (certificate of completion).
- **Networks** — practical course, 16 Jul – 1 Sep 2022, 30 practical training hours (certificate of completion).

Arduino Course (Project Maker) · 4G Academy *Feb 2021*

- Completed a hands-on Arduino course on building electronics and microcontroller projects; certificate issued 25 Feb 2021 with grade Excellent.

Python & AI with Android Mobile Application · TSA *Oct – Nov 2020*

- Completed an online course held in Cairo (1 Oct – 15 Nov 2020) by Progress and Knowledge for Educational Services (TSA); certificate issued 20 Nov 2020.

PROJECTS

KORLEN — E-Commerce App (with HTG & Veron clones)
Play Store | App Store | Admin Dashboard

- Developed a full-featured e-commerce app for online retail, including product catalog, cart, and secure checkout.
- Built 2 white-label clones of the app — HTG and Veron — reusing the core codebase with custom branding and store configuration.
- Implemented real-time order updates and push notifications via Firebase Cloud Messaging.

Tok Tok Taxi — Delivery & Ride-Hailing Platform
User App | Driver App | Agent App | Dashboard

- Built a complete delivery and ride-hailing ecosystem with live trip tracking via Google Maps.
- Developed separate apps for the customer, driver, and agent, plus an admin dashboard to manage operations.
- Implemented Bluetooth-based receipt printing and internal printing workflows for order fulfilment.

Gb Ghadir — E-Commerce App with Live Chat Support

Play Store

- Developed a full e-commerce app covering catalog browsing, cart, and checkout.
- Integrated real-time technical support via a WhatsApp chat integration and a custom in-app live chat built with WebSockets.

VA Note — Patient Management & Appointment App

Play Store | Dashboard

- Developed a patient management and appointment app for clinics with organised scheduling and visit tracking.
- Stored patient basic info, health details, and per-visit doctor notes in Firebase Firestore.
- Enabled FCM push notifications to remind patients of upcoming appointments.
- Managed app state with Bloc/Cubit under MVVM & Clean Architecture.

Vitamin — Restaurant Order Management App

Play Store | App Store | Admin Dashboard

- Built the customer-facing app for browsing the menu and placing restaurant orders.
- Developed the admin dashboard for managing orders, categories, products, and sub-products.
- Integrated with a third-party delivery service (Speedo) to hand off confirmed orders for fulfilment.
- Integrated the QCard payment gateway to support in-app payments.

SKILLS

Programming Languages: Dart, C#, Python, C++
Mobile Development: Flutter, RESTful APIs, WebSockets, Google Maps SDK
Backend & Cloud Services: Firebase (Authentication, Firestore, Cloud Messaging)
State Management: Bloc, Cubit, Provider
Architecture & Design Patterns: Clean Architecture, MVVM, Repository Pattern, Dependency Injection (GetIt, Injectable)
Automation: AI Automation, integrating automation workflows into modern software development
DevOps & Automation: CI/CD Pipelines, GitHub Actions, Version Automation, Build Configuration (Gradle, Info.plist)
Embedded & Networking: Arduino, Networks fundamentals
Development Tools: VS Code, Android Studio, Git, Firebase Console, Postman

EDUCATION

Bachelor's Degree · Tiba Academy for Science and Technology
Graduated 2023
